The investment activities defined in the strategic policies of Bahman Group mainly include creating databank for the investment activities of the subsidiary and affiliated companies and the management of such activities as well as the stock basket of these companies, carefully monitoring the headlines of the professional conferences held nationwide and taking part in the assembly meetings of the competitor companies, carrying out fundamental and technical analysis of investment companies and analyzing the important developments of the capital market to make the best us of the opportunities in the capital market and further participating in the investment market of the country based on the analyzed data and information.

To effectively realize these goals regional investment companies were founded and started operation in the primary and secondary markets. The mission of these companies has been defined as the portfolio management of the share of stock exchange companies, conducting professional analyses within different time periods and making use of investment opportunities at the primary market specially oil, gas, petrochemical industries and real estate.

The aforementioned companies were established with the aim of attracting public partnership and trust in the capital market of Iran (primary and secondary), developing shareholder culture and all inclusive ownership, supporting and improving economic basics of the middle classes of the society, reducing risk of public investment and benefiting from investment opportunities in all regions of Iran.
